

Lecture Molecular Medicine
in cooperation with the IPMM, IPHS, CCRC and SFB 829

Spotlight on...

'Talk to me! – Mechanisms of cell communication in health and disease'

SS 19 – Thursday, 12 – 1 pm
CMMC Research Building, seminar room

(A) Cell - microenvironment crosstalk

- ❖ **ECM function in health and disease: Collagen VI as an example**
Mats Paulsson, Institute for Biochemistry 09.05.19
- ❖ **The fibrillin microfibril scaffold: A niche for growth factors and mechanosensation?**
Gerhard Sengle, Institute for Biochemistry II 16.05.19
- ❖ **Cell-collagen interactions**
Beate Eckes, Translational Matrix Biology 23.05.19
- ❖ **Metalloproteinases in cancer**
Paola Zigrino, Department of Dermatology and Venerology 13.06.19

(B) Cell – cell communication

- ❖ **Tumor angiogenesis in solid tumours**
Roland Ullrich, Department I of Internal Medicine 27.06.19
- ❖ **TNF superfamily signalling in health and disease**
Silvia von Karstedt, CECAD 04.07.19
- ❖ **Angiogenesis and lymphangiogenesis in the cornea: mechanisms and clinical implications**
Felix Bock, Department of Ophthalmology 11.07.19
- ❖ **Communicating with Hedgehogs**
Catherin Niemann, CMMC & Institute for Biochemistry II 18.07.19
- ❖ **Inflammatory pathways and growth factor signalling in vascular disease**
Stephan Rosenkranz, Department III of Internal Medicine 25.07.19

Organisation and further information:

Catherin Niemann (cnieman1(at)uni-koeln.de) CMMC, Coordinator IPMM Scientific Curriculum
