

IPMM - Lecture Molecular Medicine

Spotlight on... Forever young - Frontiers in ageing research

Winter term 2018/19 - Thursday, 12 - 1 p.m. CMMC Research Building, SR

- 15.11.18 Molecular mechanisms of ageing**
Björn Schumacher - Institute for Genome Stability in Ageing and Disease
- 29.11.18 Systemic modulation of ageing and lifespan by the gut microbiota**
Dario Valenzano - MPI for Biology of Ageing
- 06.12.18 Multinucleated giant cells: friends or foes of chronic inflammation**
Mirka Uhlirova - Institute for Genetics
- 13.12.18 Inducing mtDNA deletions in mouse tissues to study if and how they affect ageing**
Rudolf Wiesner - Institute for Vegetative Physiology
- 20.12.18 Mitochondrial dysfunction and ageing**
Aleksandra Trifunovic - Institute for Genetics
- 10.01.19 Mechanisms of autophagy and cellular ageing**
Martin Graef - MPI for Biology of Ageing
- 17.01.19 Role of neuronal membrane trafficking in health and disease**
Natalia Kononenko - Institute for Genetics
- 24.01.19 Forward genetic screens give new insights into protein homeostasis and ageing**
Martin Denzel - MPI for Biology of Ageing
- 31.01.19 Mechanism of axonal injury and regeneration in peripheral neuropathy**
Helmar Lehmann - Dept. of Neurology
- 14.02.19 Axonal degeneration in ageing and neurodegeneration**
Elena Rugarli - Cologne Biocenter
- 21.02.19 Epigenetics, metabolism and ageing: trying to connect the dots**
Peter Tessarz - MPI for Biology of Ageing

Organisation & further information: C. Niemann, PI-CMMC, Coordinator - IPMM Scientific Curriculum
